

Choosing the right company...

Fitting an alarm system or any other security measures to your home or business premises is not something to take lightly. You'll want to be sure that the company you choose can be trusted, are competent to carry out the work and will be around to provide ongoing maintenance and customer care for many years to come.

That's why at Knight Installations we believe we should be your first choice when it comes to choosing the right installation company.

We are a small family run business and have been installing security systems since 1986, building an excellent reputation for providing a high quality, professional and yet personal service to all our customers. When you contact Knight Installations our aim is to make you feel like your calling a friend. We value your business and will never ask you to quote an account number (you mean more to us than that).

We never forget that our systems are protecting the things you value most, and we are committed to providing the very highest quality equipment installed to the most exacting of standards.

It is through this commitment to quality and high standards that we became the National Winner of "The 2003 Premier Award for Excellence in False Alarm Management", awarded each year to the company with the lowest rate of false alarms.

Our administrative and installation standards are regularly inspected by one of the industry's leading governing bodies, the **SSAIB**, to ensure that our customers receive the best quality of service and are treated professionally and fairly.

Dependable security protecting the things you care for most

Knight Installations

The technology to protect your

home or business
24hrs a day
365 days a year.

Affordable security from a company you can trust

What do we offer....?

At Knight Installations we take great care in the design, installation and maintenance of all types of electronic security system including: Intruder Alarms, Access Control & Telephone Entry Systems and Closed Circuit TV.

All of our systems incorporate the latest technologies from industry leading manufacturers, tailored to your particular security requirements and designed to meet almost any budget.

Intruder Alarms....

Our wide range of Intruder Alarm systems has been tried and tested for many years, allowing us to offer our customers equipment that is easy to use, reliable and well designed.

Most of our systems incorporate control panels with LCD Keypads, giving clear instructions and easy 'Full Set' and 'Part Set' procedures.

Event logs within the system allow you to find out who set the system, what time it was set and will even help pinpoint misuse or unauthorised re-entry out of hours (particularly useful for commercial clients who may need to issue keys to a large number of employees).

Multiple access codes enable you to allocate PIN numbers to individuals or groups of people, and 'Area Setting' allows you to switch off one area whilst maintaining the security in another (for example a Garage, Garden Shed, Workshop or bonded storage area)

We now also offer a range of 'wire-free' systems, particularly useful in applications where hiding the cabling is not possible due to installation of laminate or solid wood flooring products.

A range of detection devices can be fitted to any normal alarm system:

Doors and windows can be fitted with contacts or vibration sensors to detect unauthorised or forced entry.

Most commonly, passive infrared movement sensors will be installed and will detect the presence of an intruder within a protected area. In difficult environments or applications where pets are allowed to roam the premises, Dual Technology Detectors incorporating infrared and microwave circuits will offer the best immunity to false alarms without compromising on intruder catch performance.

Smoke Detectors will help to protect your family and possessions from the dangers of fire. Vital seconds saved by early warning can save lives.

Panic Alarms offer a way to activate the system if you are under attack. Our range of wire-free equipment includes radio panic buttons that can be used anywhere in the home or workplace.

Bells Only Alarms....

Until recently, the vast majority of alarm systems fitted were bells only, relying on a neighbour or passer-by to alert police of a potential break-in.

Our loud external sounder and brightly coloured housing are the ideal deterrent to any would be thief.

Monitored Alarms....

When you choose a monitored alarm system from Knight Installations, you'll have maximum peace of mind at the most competitive price. Our monitoring packages start from as little as £99.50 per year and guarantee a response to your alarm activations any time of the day or night.

Trained staff in a 24 hour manned monitoring centre ensure that key-holders and police are called out whenever your system activates. Our monitored systems are designed to meet the latest Police guidelines as laid out in British Standard DD243:2002

What's more, unlike many companies, we offer **FREE** remote resetting as part of our monitoring package, so you never need to worry about the cost of calling out an engineer just because you've made a mistake.

Maintenance & Repairs....

Regular Maintenance of your alarm system is recommended to ensure continued performance and reliability. Our engineer will carry out maintenance inspections as prescribed by British & European Standards, either annually for audible systems or six monthly for monitored systems.

You may, if you wish, enter into a Maintenance Contract and benefit from cheaper repair bills. This will be offered to you at the expiry of the guarantee period, and thereafter is renewable annually.

Unlike our competitors, we don't insist that you take a maintenance contract with us and we are always on hand to help in a crisis. After all....

We realise you have a choice !!
